

**A Safety cover - Moveable Swimming Pool Floor for
Home, Public and Commercial Pools.**

A Safety cover - Moveable Swimming Pool Floor for Home, Public and Commercial Pools.

DEPTH SPECIFIC AQUATIC THERAPY

What is the "*Family Lifeguard*"?

It is a moveable pool floor and safety cover!

The pool floor is raised and lowered, to any depth, by remote, lockable controls.

When the floor is raised above the water, it becomes the ultimate safety cover as well as additional patio space.

The floor is a rigid platform which can accommodate patio furniture when the pool is not being used for swimming.

When the pool is used for swimming, the pool floor can, within minutes, be set and locked ... one inch for babies, or any depth for teaching children to swim. For adult use, it can be adjusted to any comfort level ... full pool depth for diving or so the water is not over the swimmer's head.

Today, you can enjoy the safety and convenience of the "*Family Lifeguard*"[©] right in your own backyard or aquatic facility.

"Family Lifeguard[®]" can be designed to be installed at any of the following locations.

Wheelchairs can be self-propelled onto the platform which can then be lowered to any safe depth for therapy.

The infirm or disabled can enter the pool with the platform at the raised level, be lowered to therapy level, and raised back to exit the pool.

Children can crawl or play on the raised platform with no water present.

The depth of the pool determines the ultimate depth to which the platform can be lowered..

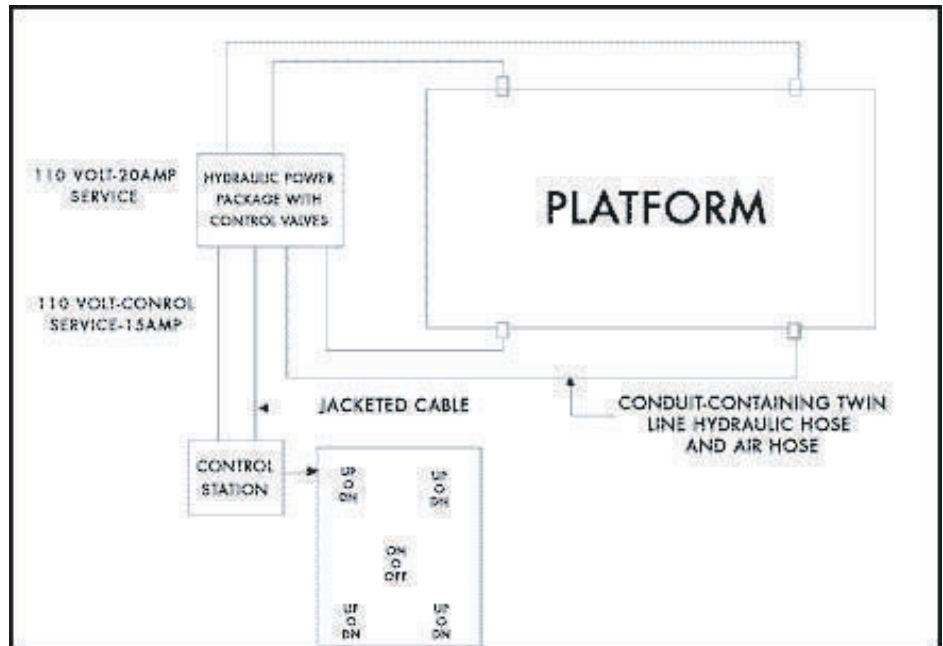

Design and Materials

Deigned with proven technology, "Family Lifeguard[®]" is economical to install. The platform components can be assembled and installed by any qualified pool contractor. The decking and substructure is constructed of durable FRP material.

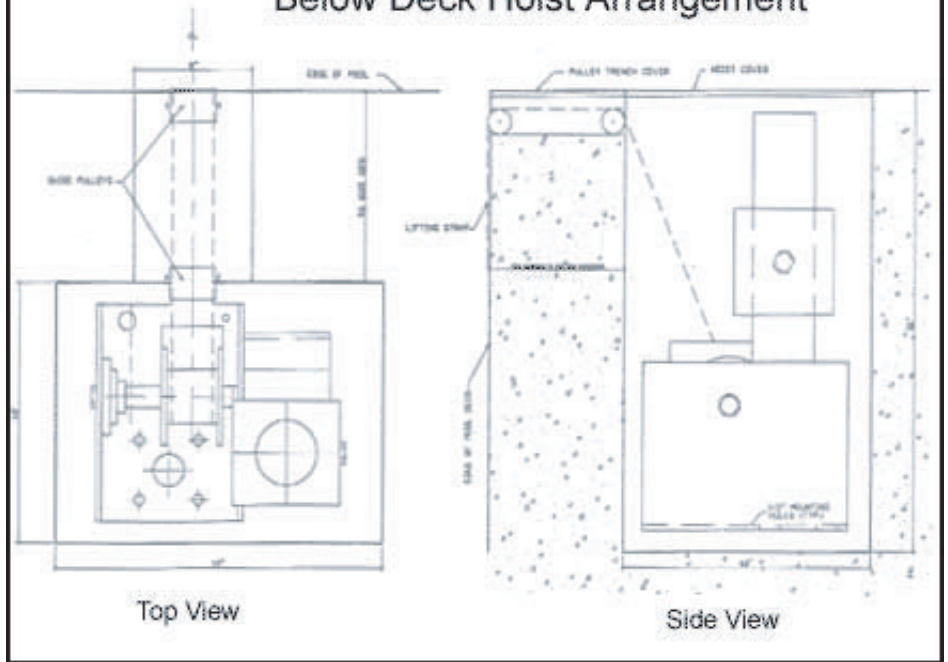

" Family Lifeguard[®]" contains no complicated electronics or computerized equipment.

All materials and plans required for installation, as listed below, are furnished by Family Lifeguard, Inc.

- Precut, predrilled, platform materials
- Lifting machinery and controls, assembled and ready for installation
- Complete installation instructions and plans

"Family Lifeguard[®]" is designed to provide a lifetime of reliable service. Our Commercial and Residential installations of *"Family Lifeguard[®]"* have given many years of dependable, efficient service.

A great reduction in chemicals is realized when chlorine is used for purification. In addition, vacuuming of the pool is practically eliminated when a *"Family Lifeguard[®]"* is installed.

"Family Lifeguard[®]" was invented by Mr. Raymond Pearlson, a noted Naval Architect and Marine Engineer.

"Family Lifeguard's[®]" design is based on the more than 40 years of experience Mr. Pearlson gained from the successful operation of the Syncrolift Ship lifting System, which he also invented. Today, over 200 Syncrolifts[®], lifting ships weighing up to 25,000 tons, are installed at shipyard in 64 countries.
